

## **The Bosham Village Design Statement**

The Bosham Village Design Statement describes the essential characteristics of our village, those that are worth keeping and what changes are acceptable. It aims to take some of the subjectivity out of planning decisions. Before seeking adoption, the draft document was given the widest possible exposure for public consultation.

It was drawn up by a team of volunteers, led by Dick Pratt, a member of the BA Committee, from the Parish Council and the Bosham Association, supported by Chichester District Council's Design Team and Chichester Harbour Conservancy. It has now been adopted by Chichester District Council as formal Supplementary Planning Guidance and is being used within the planning system. It will assist with the management of change and will give detailed design guidance based on the distinctive character of the Parish of Bosham.
